This press release may contain forward-looking information based on current information and expectations of the Company that involve a number of risk, uncertainties, and assumptions. Among the factors that could cause the actual results to differ materially are industry conditions, prices of crude oil and gas, the Company's ability to obtain and the timing of new project, and changes in competitive factor. Should one or more of these risk or uncertainties materialize, or should the underlying assumption prove incorrect, actual outcomes could vary materially from those indicated

Angin Segar Pasar Gas Bumi Domestik, PGN-INPEX Masela Tandatangani HoA LNG Blok Masela

Jakarta – Pasar gas bumi domestik kembali mendapat angin segar dengan ditandatanganinya Heads of Agreement (HOA) untuk penjualan Liquefied Natural Gas (LNG) dari proyek Lapangan Abadi di Blok Masela, antara PT Perusahaan Gas Negara Tbk (PGN) dengan INPEX Masela.

Penandatanganan HOA LNG dengan INPEX Masela berlangsung dalam IPA Convex 2025 (21/05/202) disaksikan oleh Presiden Prabowo Subianto, dimana PGN sebagai salah satu offtaker diwakili oleh Arief S. Handoko selaku Direktur Utama.

PGN tentunya mematuhi arahan dari pemerintah perihal komersialisasi LNG Blok Masela serta aspek-aspek lainnya sesuai dengan ketentuan yang berlaku. Sebagaimana 8 kerja sama yang sudah lebih dulu ditandatangani PGN, alokasi gas dari Blok Masela juga akan diprioritaskan untuk kebutuhan gas dalam negeri.

PGN sangat mengapresiasi pemerintah atas support yang berkesinambungan untuk pemenuhan gas bumi domestik. Terlaksananya HOA dengan Inpex Masela memberikan kepastian pemanfaatan gas dari proyek strategis, Blok Masela.

Optimalisasi pemanfaatan gas dari Blok Masela sejalan dengan arahan Presiden RI Prabowo Subianto agar pemerintah, BUMN, serta badan swasta dalam maupun luar negeri berkolaborasi untuk mendukung transisi energi dan mengurangi ketergantungan terhadap impor energi.

“PGN akan memanfaatkan LNG Blok Masela sebagai pelengkap pasokan gas bumi untuk memenuhi kebutuhan di domestik. Pasokan gas dari Blok Masela diharapkan dapat semakin memperkuat komitmen PGN untuk terus menyediakan gas bumi bagi pelanggan,” terang Arief.

Pasokan dari salah satu proyek LNG terbesar di Indonesia, juga memungkinkan untuk mendorong pengembangan infrastruktur untuk membawa gas bumi sampai ke end user. Peran pemerintah dan badan usaha sebagai mitra strategis yang solid

Indonesia's Domestic Gas Market Gains Momentum as PGN and INPEX Sign LNG Deal for Masela Block

Jakarta – Indonesia's domestic natural gas market received a notable momentum with the signing of a Heads of Agreement (HoA) between PT Perusahaan Gas Negara Tbk (PGN) and INPEX Masela, facilitating the sale of Liquefied Natural Gas (LNG) from the Abadi Field in the Masela Block.

The signing ceremony occurred during IPA Convex 2025 (May 21, 2025) and was attended by Indonesian President Prabowo Subianto. Representing PGN, one of the key offtakers, was Arief S. Handoko, President Director.

PGN remains dedicated to aligning with government directives regarding the commercialization and regulatory compliance related to the Masela Block LNG. Following the pattern of eight previous agreements, the gas from Masela Block will primarily serve domestic demands.

PGN appreciates the government's steadfast support toward securing the nation's natural gas needs. The successful agreement with INPEX Masela solidifies the utilization of gas from the strategically significant Masela Block.

Utilizing gas from Masela aligns with President Prabowo Subianto's vision of collaboration among government entities, state-owned enterprises, and both domestic and international private sectors to drive the energy transition and decrease reliance on energy imports.

"PGN will leverage LNG from Masela Block as a complementary source to fulfill domestic gas requirements. The gas from Masela Block is expected to significantly enhance PGN's ability to continuously supply natural gas to customers," explained Arief.

Gas supply from one of Indonesia's largest LNG projects may further catalyze infrastructure growth designed to deliver natural gas directly to consumers. Robust partnerships between government and business entities are anticipated to optimize the Masela Block's value, strengthening national energy security.
