Organization & Business Portfolio

UPSTREAM

Support portfolio resilience

- Exploration and production through our subsidiary

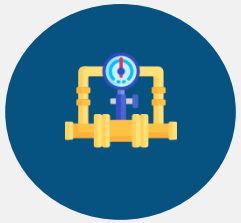

MIDSTREAM

Enables nationwide connectivity and gas monetization

- Gas transmission pipelines
- LNG Regasiffication facilities (FSRU & onshore)
- LNG trading, hub and storage facilities
- Oil transportation infrastructure

DOWNSTREAM

Integrated services to the end miles of end user

Distribute gas to the end miles of end user through:

- Pipeline Netwotk
- Beyond Pipeline (CNG /LNG /VGL/MRU)
- City gas network

KEY CUSTOMER SEGMENTS

Power Plants
Gas-fired power plant is more environment friendly compared to oil or coal.

Industrial Sector
Indonesia's growth is driven by its industrial sector, and we strive to promote fuel efficiency by distributing natural gas to key industrial areas.

Commercial Customer
Efficiency and reliability are key in delivering energy to commercial customers, and we meet those needs.

Household Customer
PGN has distributed gas household customers in 78 cities/regencies all over Indonesia.

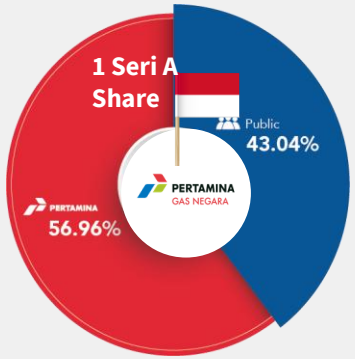

Gas for Transportation (Gas Fueling Station)
Our Subsidiary, Gagas Energi Indonesia operates 14 Gas Filling Stations in 11 cities in Java and Sumatera.

Connecting Indonesia to a Greener Energy

PGAS' Shareholders

Strong Presence

61 yrs

Experience & Expertise
in the industry

Provide Greener Energy

Natural gas has Lowest Carbon Emission

Natural Gas emission is 435 grCO2/Kwh, **approximately 58–61%** less CO_2 than coal or oil

EIA - U.S. utility-scale net electricity generation and resulting CO2 emissions by fuel in 2023 (Processed Data)

Business Portfolio

- Upstream (11 E&P blocks)
- Midstream
- Downstream
- Others

Market Share

> 91,36%

Major player in gas trading

Pipeline Network

Total > 33.913 km

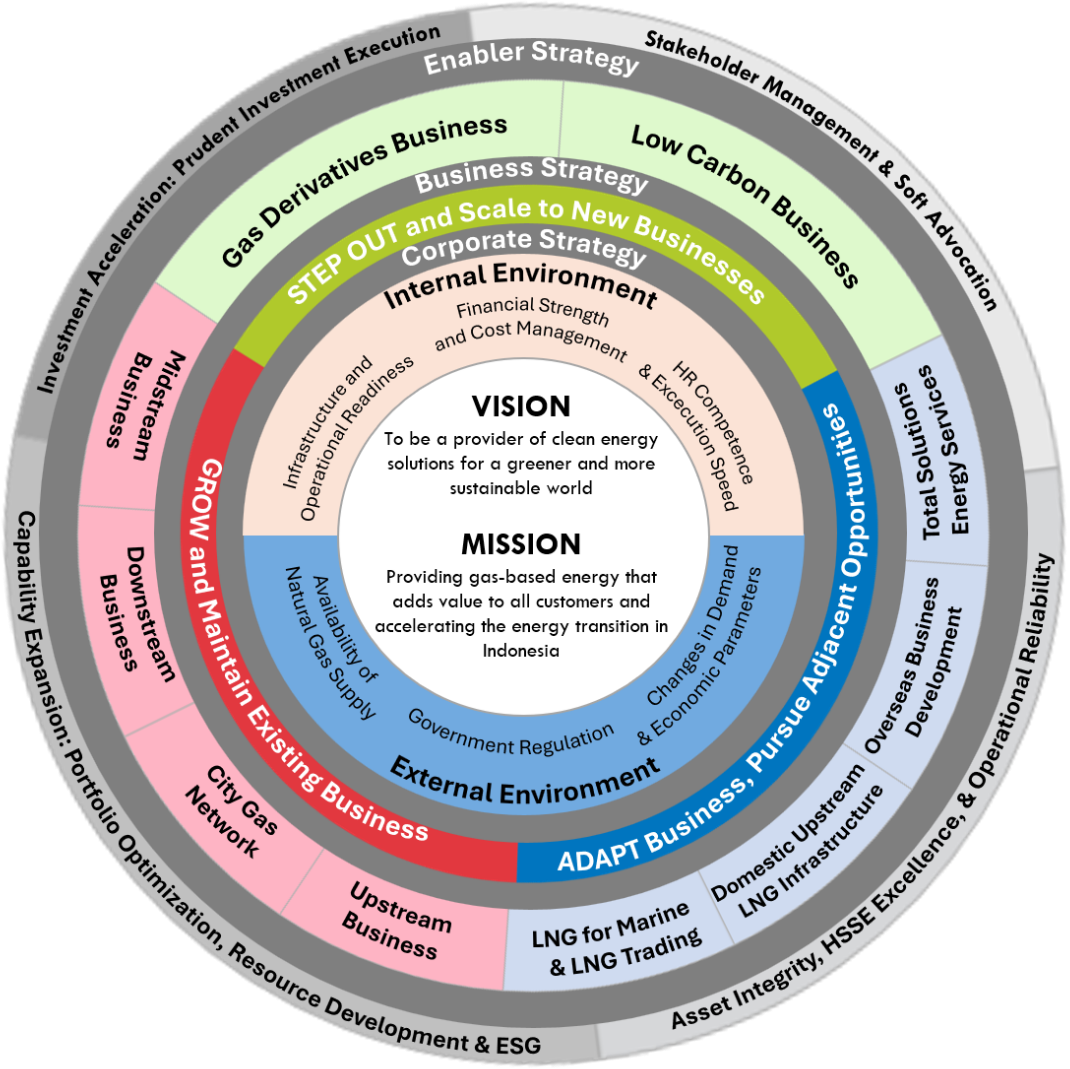

- Gas Pipeline: 13,605 km
- Oil Pipeline: 605 km
- City Gas Pipeline: 19,703 km

Gas Infrastructure

- 2 LNG FSRUs . 5 LNG Tanks, 2 LPG Tanks, 1 land-based regas terminal
- 14 Gas Fueling Stations, 4 MRUs, 1 Mother Station
- 3 LPGs processing plant (stripping, fractionation & compression), 1 NGL extraction

Sub-holding Gas Strategic Wheel

PGN defines a strategic pathway to **strengthen core business**, scale **new growth engines**, and position the company in **future energy markets**. In accordance SHG's vision to become **a leading clean energy solutions provider**, the strategy focuses on sustainable value creation, portfolio diversification, and support for Indonesia's energy transition. The strategy is executed through three integrated strategic pillars, operating as a reinforcing system to ensure resilience, competitiveness, and long-term shareholder value.

Grow and maintain existing business

Midstream Business

Expansion of natural gas, oil, fuel, and LPG transportation infrastructure, LNG regasification, and processing of stranded, raw gas, and natural gas

Downstream Business

Strengthening gas and LNG trading, including unconventional gas (SNG, CBM), and expansion of CNG/LNG (beyond pipeline).

City Gas Network

Extension of city gas networks infrastructure to drive national LPG import substitution.

Upstream Business

Optimization and expansion of production-exploration assets to maintain reserve growth and supply stability.

Adapt business, pursue adjacent opportunities

LNG for Marine & LNG Trading

Development of LNG for marine and global LNG trading business to unlock global potential market.

Domestic Upstream LNG Infrastructure

Strategic investments in domestic LNG infrastructure to secure LNG supply, and strengthen the LNG value chain.

Overseas Business Development

Expansion into international markets, unlocking new gas demand, and enhancing PGN's position in the global gas ecosystem.

Total solutions Energy Services

End-to-end energy services covering EPC, O&M, digital solutions, and facility management to create added-value products to customers.

Step-out and scale to new businesses

Gas Derivatives Business

Leveraging natural gas conversion into higher-value products such as hydrogen, methanol, ammonia, urea, and petrochemical derivatives to maximize monetization.

Low Carbon Business

Development of biomethane, blue hydrogen, blue ammonia, and CCS/CCUS infrastructure to position PGN as a key enabler of the clean energy ecosystem and unlock the low carbon business development.

Leadership Team

Board of Commissioners

Tony Setia Budi Husodo
President Commissioner concurrently serving as Independent Commissioner

Executive Summary

Summary of 6M-2026 Performance

Financial Highlight

Consolidated revenue in 6M 2026 reached USD 2 billion, driven primarily by gas trading and regasification activities. We were able to manage the stable cost of revenue USD 1,615 million, generate gross profit of USD 390 million and net profit of USD 202 million. EBITDA and cash balance reflected business resilience and financial health amid challenging market conditions.

Revenues	Net Profit	EBITDA	Total Asset	Cash & Cash Equivalent	CAPEX
USD 2,005 Million	USD 202 Million	USD 525 Million	USD 5,861 Million	USD 1,127 Million	USD 63 Million

Operational Highlight

The consolidated revenue was generated by several business segments among others gas trading, transmission, oil & gas lifting, regasification and oil transportation. **Customer base grew** in small business & household segments with expanded customer attachment.

Gas Trading	Transmission	Oil & Gas Lifting	Regassification (include TUA)	Oil Transportation
821 BBTUD	1,615 MMSCFD	16,733 BOEPD	288 BBTUD	151,881 BOEPD

Strategic Projects Updates 6M 2026

Capex Plan 2026

2026 Capex Breakdown per Business Segment

USD 353 million

Downstream & Others

- Extention of customer attachment domestic gas trading
- Development of city gas network
- CNG & LNG retail
- Extention of distribution network to Sei Mangke
- Development of biomethane injection point
- Development of flat bottom tank of LNG terminal
- Development of potential LNG infra business
- Development of oil pipeline network

Upstream

- Drilling of exploration and development well

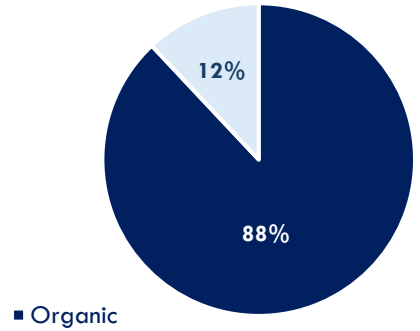

2026 Capex Breakdown per Investment Type

USD 353 million

Organic Investment

- Development of oil pipeline network
- Extention of customer attachment
- Development of city gas network
- CNG & LNG retail
- Extention of distribution network to Sei Mangke
- Development of biomethane injection point
- Development of flat bottom tank of LNG terminal
- Drilling of exploration and development well

Anorganic Investment

- Chip-in the development of potential LNG infra business

Strategic Projects Update

4 Physical Progress & Target	58.3% Target : Q3 2027 Commissioning	0.9% Target : Q2 2028 Commissioning	25,068 potential household 152 km pipe connection Target : 50,000 Potential Household	70.4% Target : Q1 2027 Commissioning

Customer Attachment

In order to extend the access of gas to customers, PGN has been actively constructing distribution pipeline across the country in 10 Provinces and 17 Cities.

By building pipeline network as a **customer attachment** program to **expand gas market**, gas trading volume is expected to eventually increase.

Capex 2026 is approximately US$21.64 million, with US$5.87 million realized to date, supporting the target to increase sales volume to 30.57 BBTUD.
